

PROFESSIONAL SUMMARY

- Having 4.5+ years of experience as Software Developer in JavaScript, Angular2+, Rest API, ReactJS.
- Experience in development using NodeJS, Express.js, EJS.
- Having experience on HTML, CSS, SCSS and CSS frameworks like Bootstrap, ANT Design, Material UI.
- Experience in upgrading the system as per the requirement of the client.
- Experience in VS Code.
- Flexible working in Windows, Mac OS and Linux.
- Experience in GIT (Bitbucket, Github, Gitlab), JIRA.

TECHNICAL EXPERTISE

- **Technologies:** JavaScript, Node.js, Express.js, Angular V2+, ReactJS, jQuery, Storybook.
- **Database:** MySQL
- **IDE:** Git, JIRA, VS Code.
- **React Tools:** React js, Redux, Enzyme

EDUCATIONAL DETAILS

2016: B.E (Bachelor of Engineering) from OM Engineering College, Junagadh.

WORK EXPERIENCE

Working with BIZTECHNOSYS as Senior Software Engineer since, Feb 2017

PROJECT DETAILS

#1 Accelevents

Description:

This is a platform for hosting virtual and in person or Hybrid events. Host can organize event and set tickets and can add some add on. Host can also use it for auction and various types of events.

Responsibilities:

- Front end Development
- Team collaboration.
- Technical R&D.
- Integrating third party libraries.
- Creating components using story book and figma.

#2 Incident Response Tool

Description:

An enterprise-built security incidents response platform with capabilities for automated action store solves the incidents efficiently and effectively.

Responsibilities

- Frontend and backend development.
- Third party services integration.
- Managed system configuration and its documentation to make sure planning and execution were run efficiently
- Provide software engineering support for Information Systems utilizing object oriented programming and client/server applications.

#3 Client: Rodion

- Built and Deployed software products.
- Worked on Reactjs to develop UI and integrated it with BE [Backend].
- Modified services and fixed issues.
- Worked closely with clients to establish problem specifications and system designs.
- Collaborated with team members to create an application's system based on client requirements.

#4 Client: Zeronsec

- Worked closely with project owners to implement project architectures.
- Developed boiler plate and Frontend and Backend architecture (flow) of the project.
- Worked on Angular7, 8 and ReactJS to develop UI and integrated it with BE [Backend].
